Reader: Greetings. I am the earthalien living in the house where Usopp's father Yasopp's friend's brother's girl-friend used to live.
*Earthalien is someone who is half earthling and half alien.

Oda: Really? Question Corner is starting!! (Doom)

Q: On both sides of the skull on Don Krieg's pirate flag, there are hourglasses symbolizing the threat to his enemies, but were hourglasses ever really used like that?

A: There really were Jolly Roger flags with hourglasses on them. They symbolized the prey's appointment with death, basically: "Your time is running out!"

Q: Oda Sensei, since Luffy is a rubber man, do **all** of his body parts stretch?

A: Yes, everything stretches.

Q: A question. How many g/cm^3 is Sanji's kick strength? Please calculate to two decimal points and let me know.

A: To be frank, measurement is not possible. You know that game at the arcades where you can measure your kick strength? If, for example, Sanji did that, the whole machine would go flying out of the building. But if I had to put it into units, I'd say 21 bats--the energy required to break 21 wooden bats with one kick.
